CO <sub>2</sub> consumption summary	9
Session information	10

## Global summary

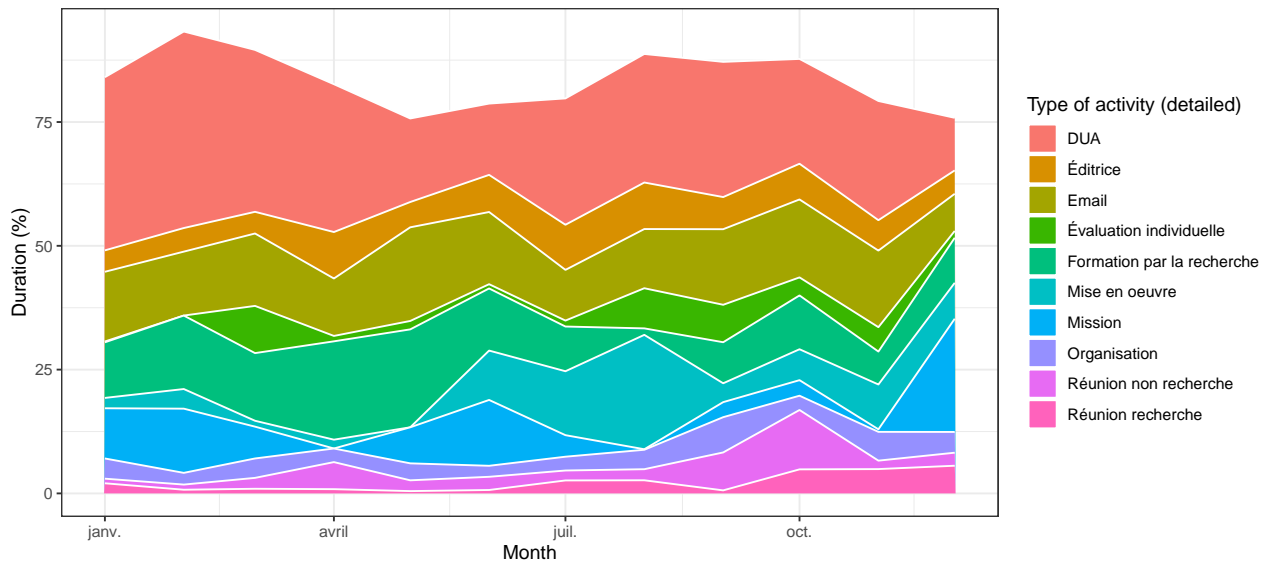

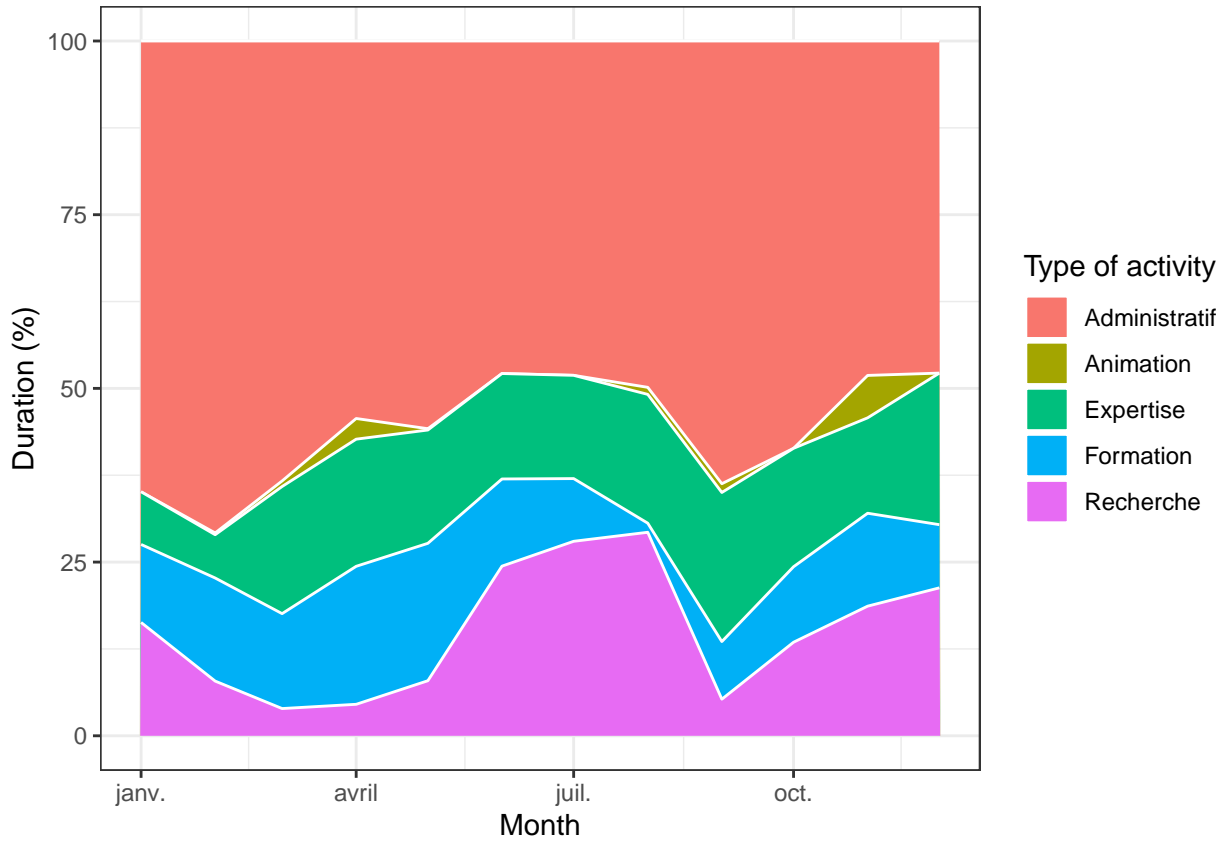

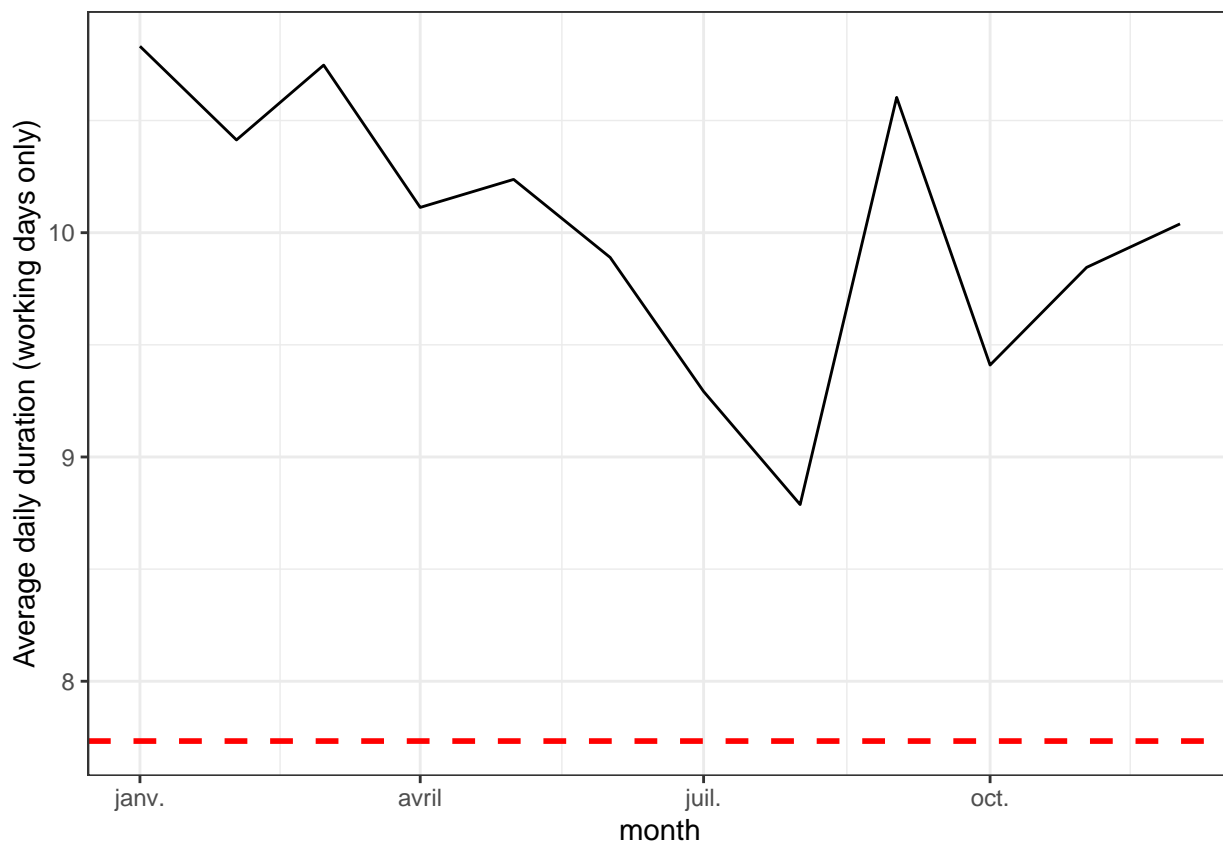

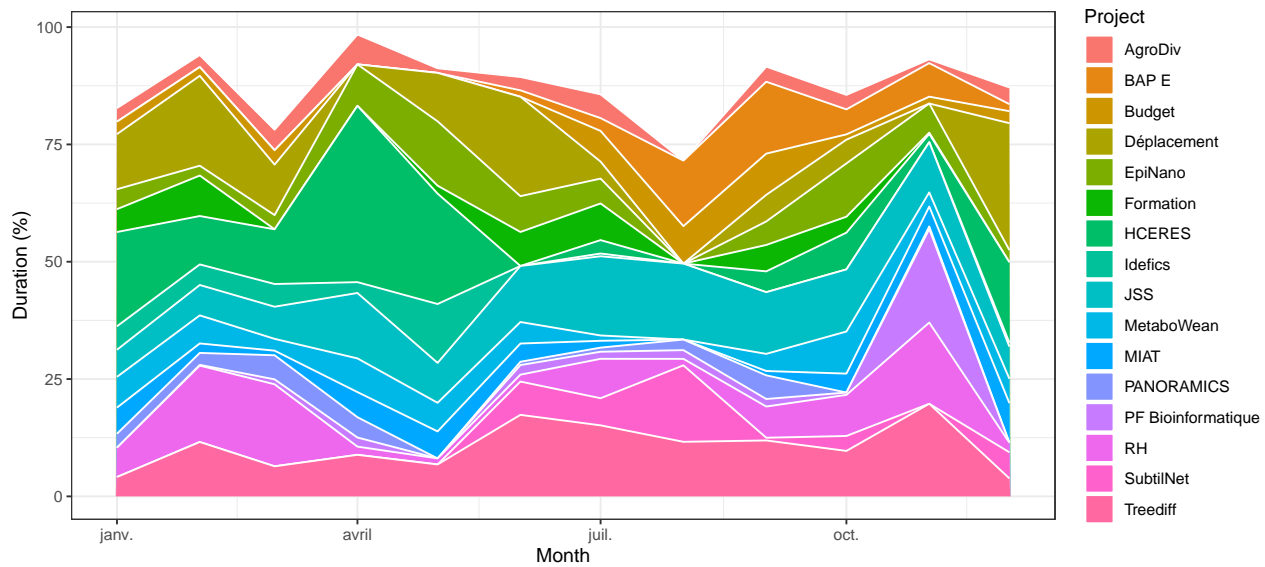

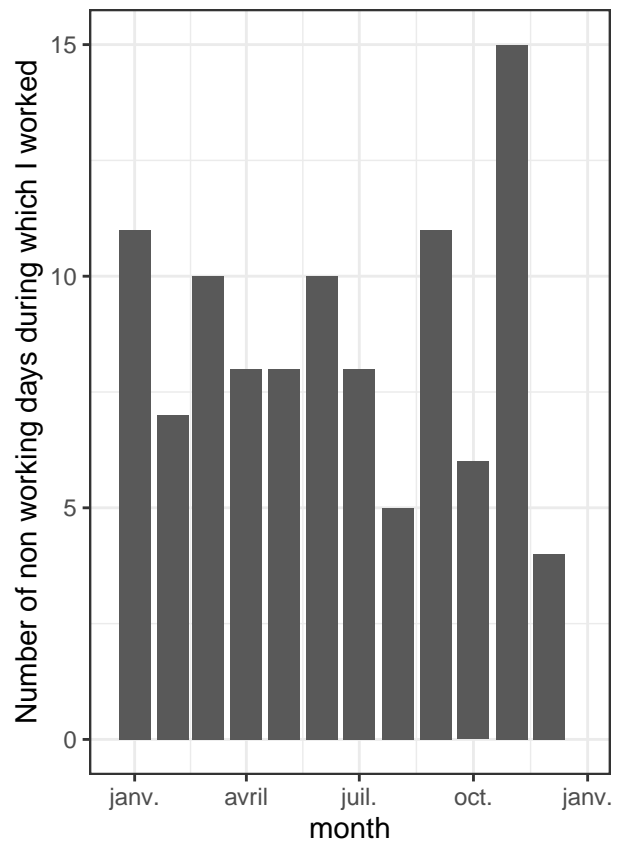

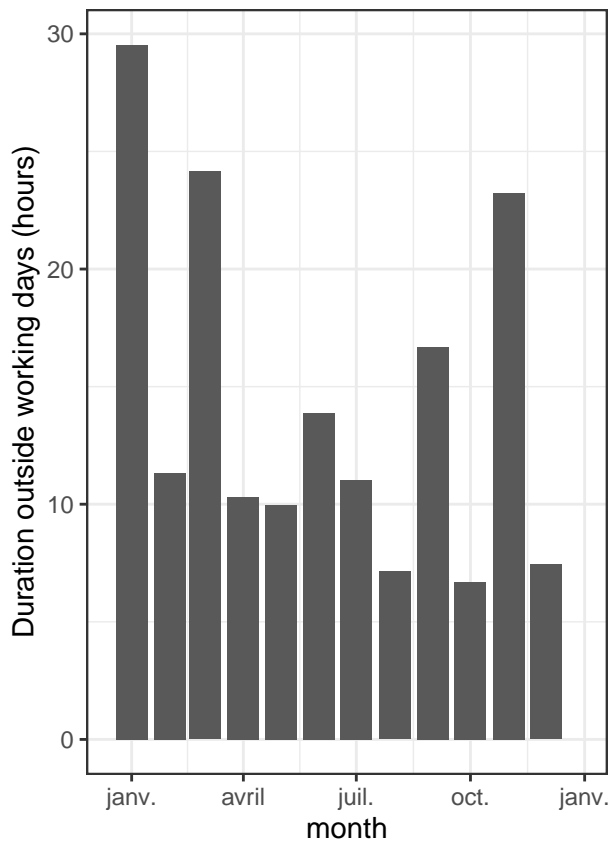

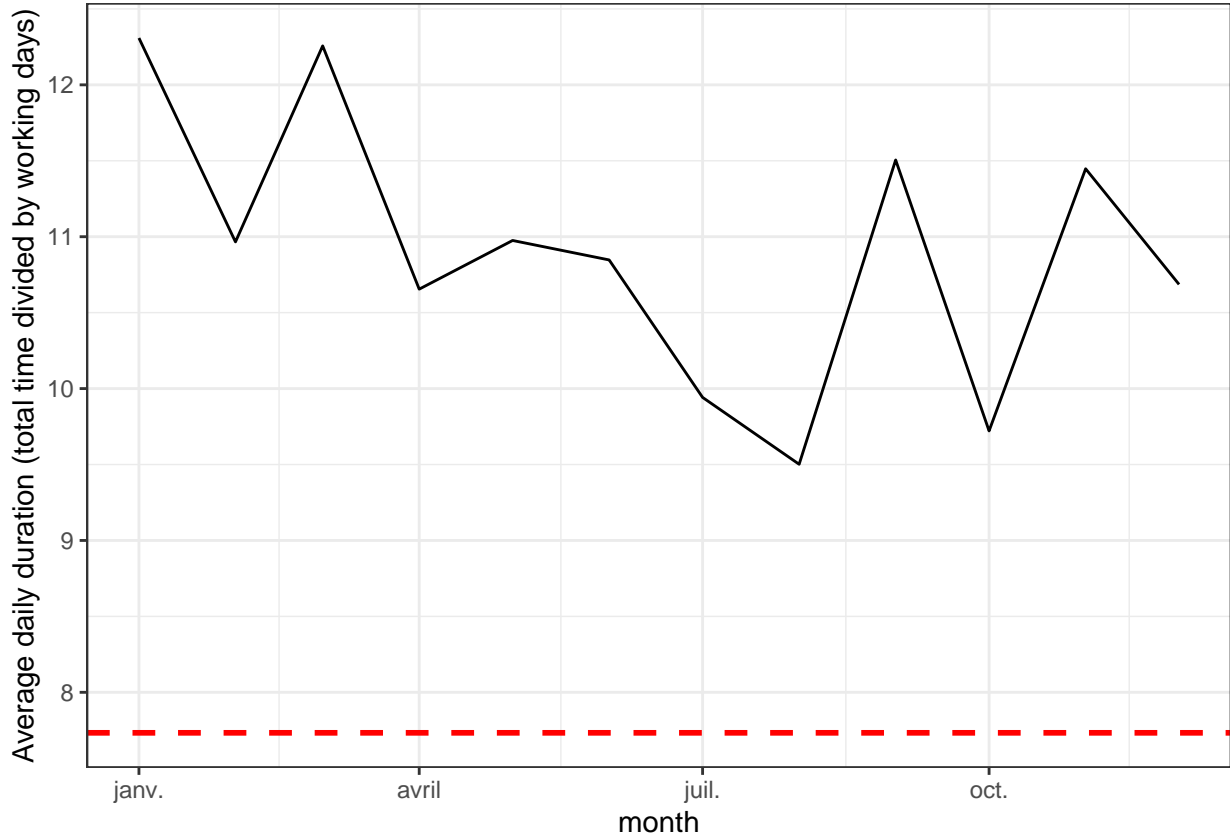

The number of working days is 196.5 with an average working time of 10.07 hours per day, which corresponds to a total of 459 overtime hours compared to legal time (140 overtime minutes every day on average).

In addition, I worked during 103 non working days, for a total number of hours equal to 171 hours, corresponding to 1.66 hours per day worked outside of legal working days.

# Evolution along the year

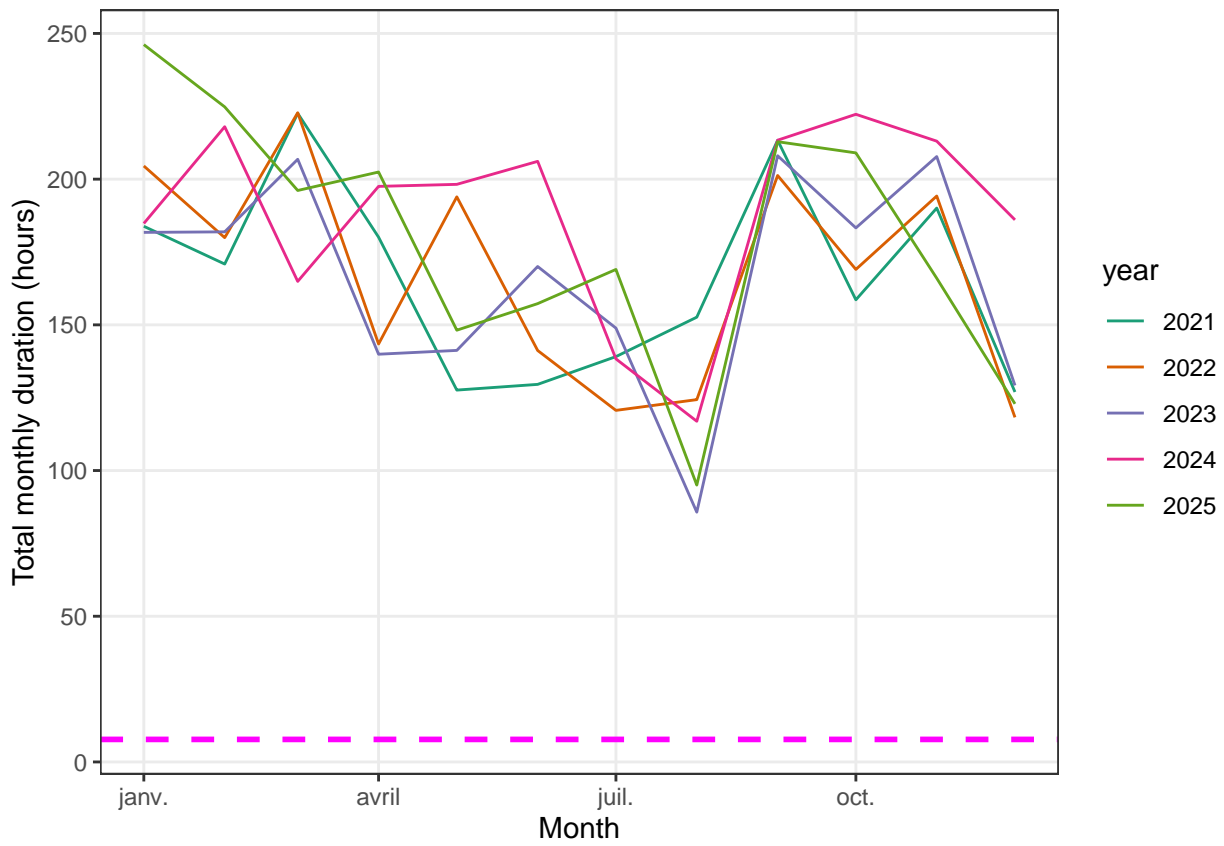

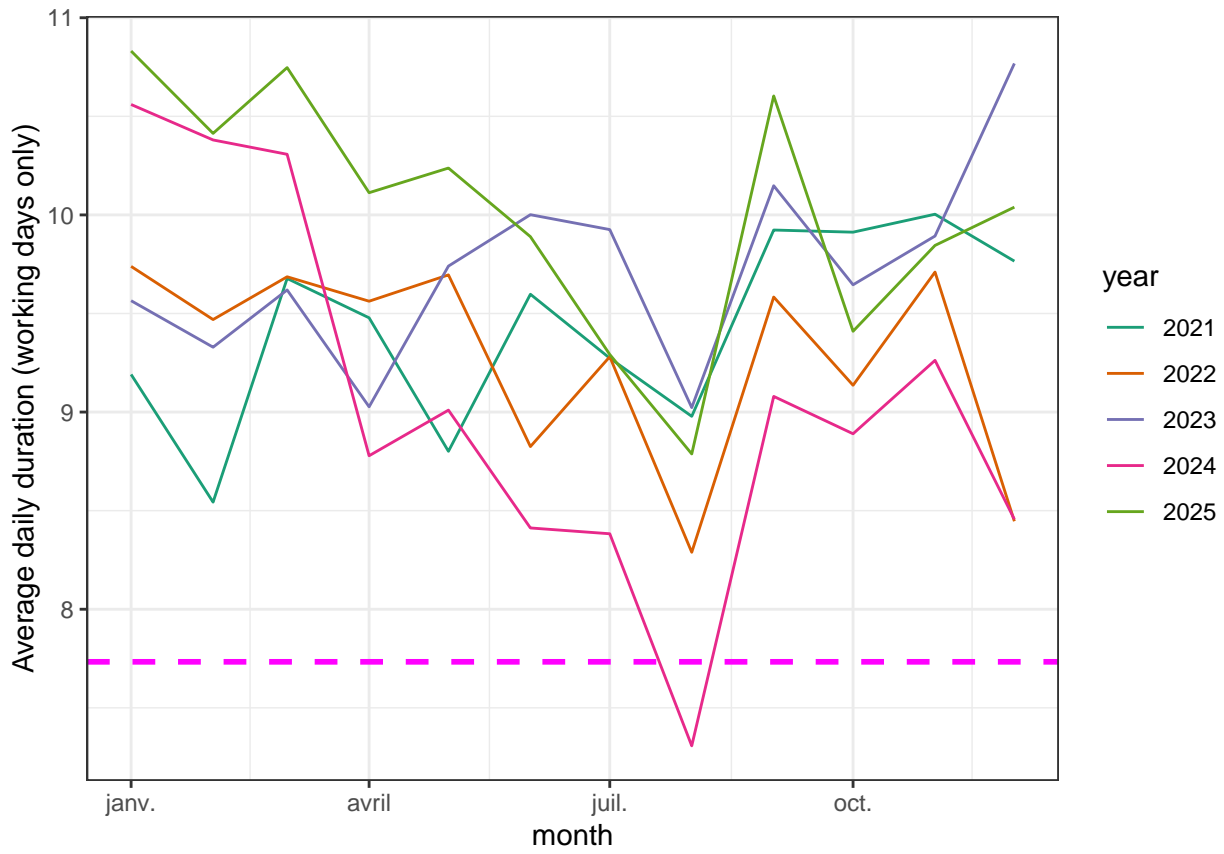

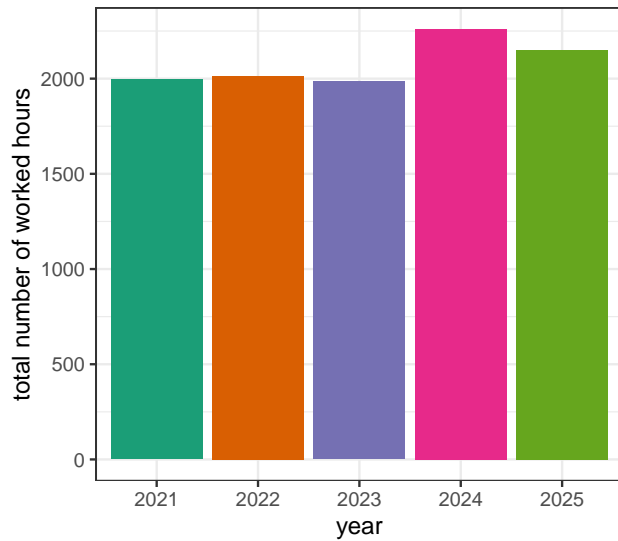

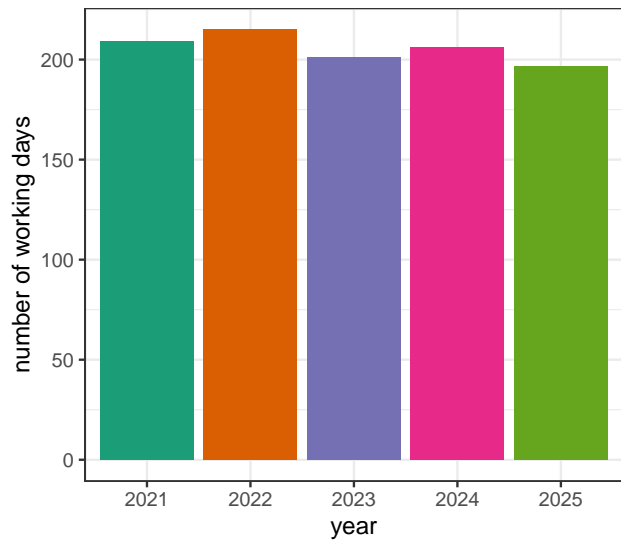

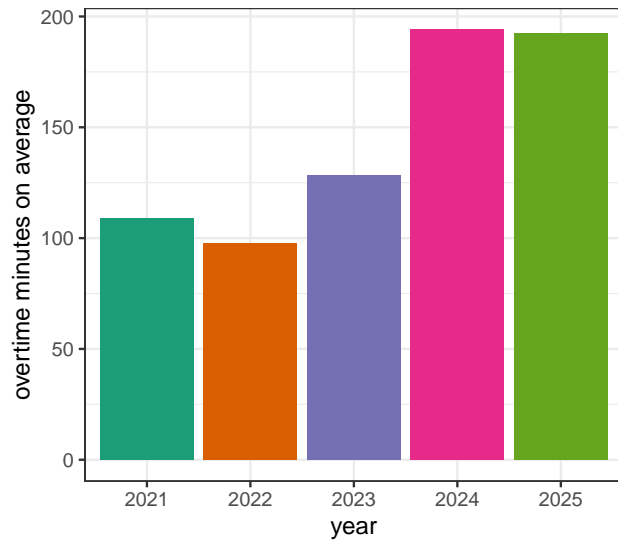

# Comparison with previous year

*Important note:* I started recording hours worked outside of normal working days in 2024. Thus, hours reported before 2024 do not include hours worked outside of normal working days (*i.e.*, weekends, and vacations).

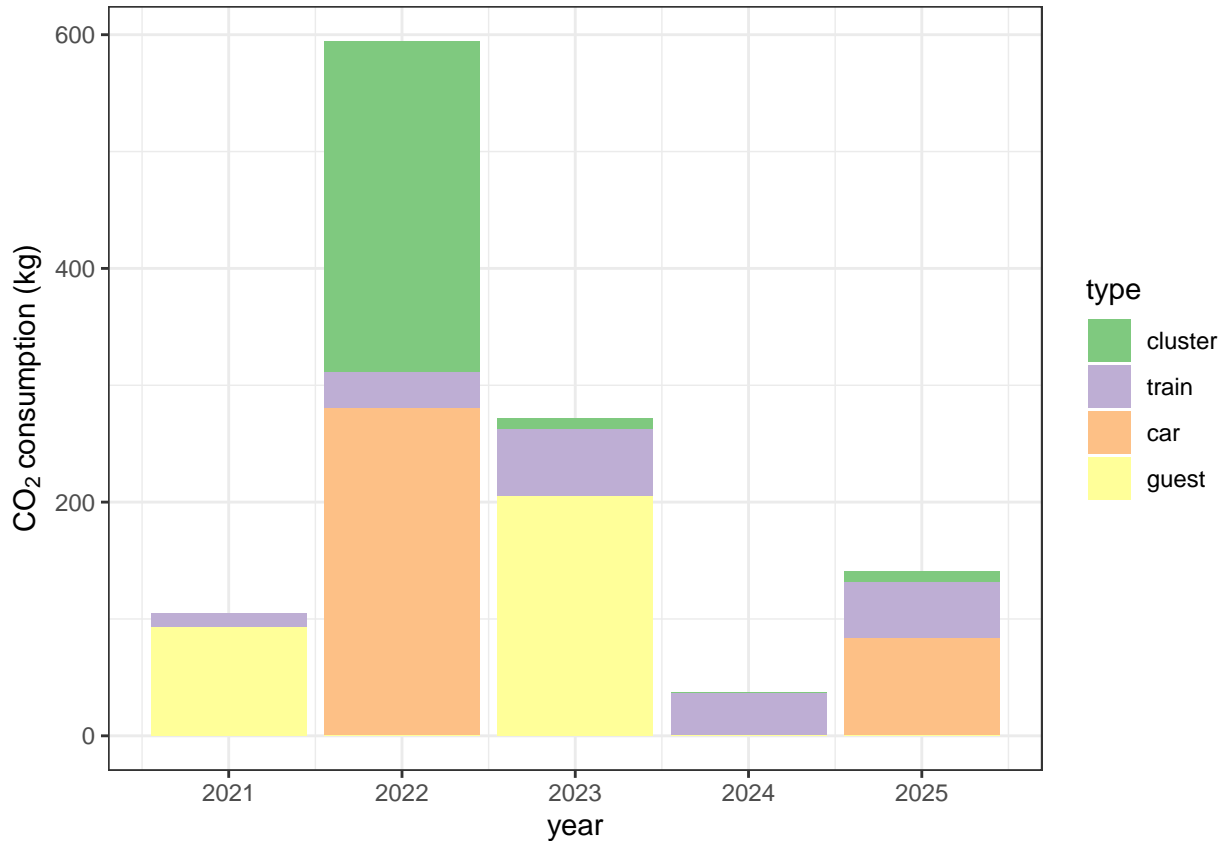

## CO<sub>2</sub> consumption summary

My CO<sub>2</sub> consumption at work is divided into four categories:

- usage of the Genotoul-bioinfo cluster (not available in 2021)
- travels by train
- travels by car
- invitation of guests (the consumption for this category is split between all the people inviting the guest)
